# Setup on Linux

At the moment, the only supported platform is:

- Ubuntu 12.04 LTS Precise Pangolin x64

## Online Installation

1. Download and install the [repository public key](#)

```
wget -q http://www.call-replay.com/apt/RAISoftware.asc -O- | sudo apt-key add -
```

2. Add the appropriate repository line in your `/etc/apt/sources.list` file

```
deb http://www.call-replay.com/apt wheezy non-free
deb http://www.call-replay.com/apt precise non-free
```

3. Update and install CallReplay

```
sudo apt-get update && sudo apt-get install callreplay
```

## Offline Installation

1. Download the Ubuntu Linux x64 version from the [CallReplay site](#)
2. Install dependencies

```
sudo apt-get install openjdk-7-jre postgresql postgresql-contrib libpcap0.8
p7zip-full speex sox libav-tools dmidecode
```

Optional packets for desktop environments:

```
sudo apt-get install flashplugin-installer pgadmin3
```

3. Install CallReplay

```
sudo dpkg -i callreplay-*.deb
```
